Genus Cycnoches

Cycnoches comprises 34 species of low-elevation, warm to hot growing epiphytes from seasonally dry forest occurring as far north as southern Mexico and as far south as northern Argentina. Their elongated, leafy, cigar-shaped pseudobulbs can grow quite large in a single season and will usually continue to grow as long as they are given warm temperatures. (Miranda 2012).

The genus *Cycnoches* has two sections, *Eu*(*Cycnoches*) or true *Cycnoches* and *Heteranthae* or fingered-lip *Cycnoches*. The *Eu*(*Cycnoches*) species produce the large "swan-shaped" flowers. The male flowers are of similar shape to the female flowers, although slightly smaller and more numerous. The Heteranthae group produces totally different-looking male and female flowers. The female flowers are similar to those of the Eu(Cycnoches) group but have more pointed lips. The male flowers have five or more finger-like appendages on the lip, with up to 45 small flowers on an inflorescence. (Monnier 1990).

Names	Progeny F1/Total	Awards	FCC	АМ	нсс	JC	AD	AQ	сс	CCE	ССМ	СНМ	CBR	СВМ	Total	Strenghten	Weakness
Cyc. warszewiczii	57	17	1	9	2									1	13	Well-balanced, full-flowered. Flower size	
Cyc. pentadactylon	31	21		3	1						2	1			7	Can improve flatness when crossing with a reflexed flower. Dotted can be imparted	Narrow segment can be dominant.
Cyc. chlorochilon	29	30		7	5	1					8				21	Improved form and color on the offspring's.	
Cyc. haagii	19	11			1	2					1			1	5	Floriferous, multiple inflorescences. Scattered red spot and it may dominant.	
Cyc. barthiorum	17	29		12	6						1	1			20	Source of dots and spots, floriferous.	
Cyc. cooperi	14	44	2	20	5	1		1		2	1	1				Floriferous. Well shaped balanced flower. Sometimes plants will flowers simultaneously.	
Cyc. herrenhusanum	14	11		4	2						2	1			9	Excellent flower shape with wide petals, good color and floriferous.	Tendency for the petal tips to recurve
Cyc. lehmannii	11	4				1					1		1		3		
Cyc. loddigesii	10	19		1	2						2			1	6		
Cyc. egertonianum	7	7		2	1	1					1			1	6		
Cyc. peruvianum	3	4									1	1	1		3		Inconsistent flower shapes
Cyc. ventricosum	2	1									1				1		
Cyc. aureum	1	3		1									1		2		
Cyc. carrii	1	2									1	1			2		
Cyc. dianae	1	2		1								1			2		
Cyc. maculatum	1	1											1		1
