## Paphiopedilum Descriptions

### 1. *Paphiopedilum emersonii*

*Paphiopedilum emersonii* has received 27 awards from 1987 to 2012.

Description: One inflorescence; one flower; dorsal petal translucent white, hooded, pinched distally; lateral petals translucent white, white veining, pale burgundy spots at base; pouch pale greenish tan, pale green blotches, light burgundy cascading from

pouch opening; staminode bright yellow, parallel maroon stripes, edged white; substance translucent; texture crystalline.

2.

### *Paphiopedilum spicerianum*

47 awards from 1970 to 2013

Description: One flower on a single inflorescence; dorsal petal pure white, apple green base fading to yellow, pinched at base, midline heavy mahogany stripe; synsepal mint green; petals apple green, midline brushed with burgundy, undulated edges; pouch olive green with cordovan overlay, subtly veined mahogany, interior

lime green, burgundy lining; staminode purple, picotee white; substance firm; texture matte.

3.

### *Paphiopedilum charlesworthii*

49 Awards from 1973-2011

Description: Single inflorescence, single flower; dorsal petal light purple, hooded, deep branching raspberry veins; synsepal lime green; lateral petals cupped forward, olive green, cordovan veining radiating from center; pouch olive green, chestnut veins, interior olive green, cordovan spots centrally, staminode white; substance moderate-firm; texture varnished.

4.

## *Paphiopedilum coccineum*

CHM/AOS 81 points Nov. of 2017

### Description:

Single inflorescence, single flower; dorsal sepal hooded, white distally fading to light purple to deep burgundy centrally, pinched; petals narrow, undulated, pale green margins, cordovan veins, burgundy speckles distally; pouch pale yellow green, burgundy overlay, cordovan veins, interior pale yellow green, cordovan veins; staminode translucent pale yellow; substance soft; texture waxy.

5. *Paphiopedilum tigrinum*

39 Awards from 1991 to 2010

Description:

Single inflorescence, single flower; dorsal petal apple green, chocolate brown blotches, tapered proximally; lateral petals undulated, spatulate ends, apple green, dark chestnut linear markings, eggplant purple at distal ends; synsepal light green; pouch apple green, flushed with cordovan; staminode light green, chocolate brown center; substance thick; texture matte
