Vanda Kasem's Jewell [V. Gordon Dillion x V.Kasem's Delight] Photo C.Koehler; Plant private collection

Description:

A large plant measuring 33.5" in height.

The bloom is large, flat, and full. The measurements: Natural spread H. 4; Nat. spread V 4; Dorsal sepal W. 2.5; Petal W. 2; Petal L. 2; Lat/sepal W. 3.7; Lip W. 0.6; Lip L 1.

Thirteen blooms; one bud; one 14" inflorescence. Color deep burgundy; dorsal sepal burgundy, rounded edges, pale yellow patterning overlaid burgundy; lateral sepals deep burgundy, slightly ruffled; Petals burgundy, pale yellow patterning overlaid burgundy, slightly ruffled outer edge, raised mid-line, textured; anther cap yellow; side lobes yellow; lip undulated black-burgundy, fused 90 degree from floral plane, slight speckling burgundy inner lip. Substance firm; texture velvety. [lip waxy]

V. Yip Sum Wah (photo C. Koehler; private collection)

Description:

Numerous blooms, evenly spaced, one inflorescence. Flower flat, symmetrical, round, iridescent orange-red; dorsal sepal orange-red, dark red veining, irregular red splotching; lateral sepals orange-red, evenly rounded, dark red veining; petals iridescent orange-red, dark red veining, rounded edges; anther cap violet brown; lip deep purple-orange, fused 90 degree from floral plane. Substance firm; texture velvety.

V. Pachara Delight (photo C. Koehler; private collection)

Description:

Flower flat, symmetrical, full, round; color pure white, lavender overlaid; dorsal sepal pure white, lavender overlaid, dark lavender tessellation; petals pure white, lavender overlaid, dark lavender tessellation, raised margin centrally, one-half distally; lateral sepals uniform; column pure white; anther cap pure white; lip black-purple, undulated, fused 90 degree from floral plane. Substance firm; texture velvety.

**Description:**

Flower shape irregular, twisted, reflexed; margins smooth, wavy, ruffled; background color cream, overlaid irregular spotting caramel-brown, pale yellow distal, fading proximal; Dorsal sepal out-rolled proximal, flared, rounded medial, curved correct distally; lateral sepals wavy, twisted, reflexed; Petals twisted, reflexed, wavy; lip yellow-green distal, caramel-brown stripping proximal; side lobes flared, green-white fading to watermelon red; staminode pale yellow; column pure white. Substance firm; texture smooth.

Description:

Flower shape erect, open, distinct; Background color stark white; Dorsal sepal elongated, margin smooth, stark white proximally fading lavender distally; Lateral sepals stark white, fading dark lavender distally, elongated, flaring outward distally; Petals elongated, stark white fading lavender distally, margins smooth; lip stark white proximal, fading deep lavender distally, tip curved outward; staminode yellow, pale lavender centrally; side lobes stark white, tipped lavender, curved inward; Substance firm; texture crystalline.
